BOOKING PROCESS

Where do you want to go?

Centerat & South-
ameltraica

America

Africa

Asia

Europe

Australia

1) User completes tier 1 of search form on landing page

User enters destination (city/country), departure date, return date and number of passengers to search for applicable tours.

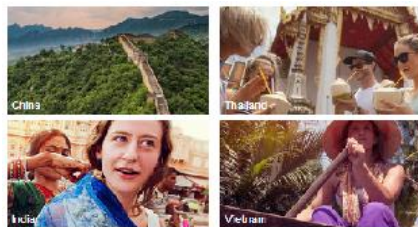

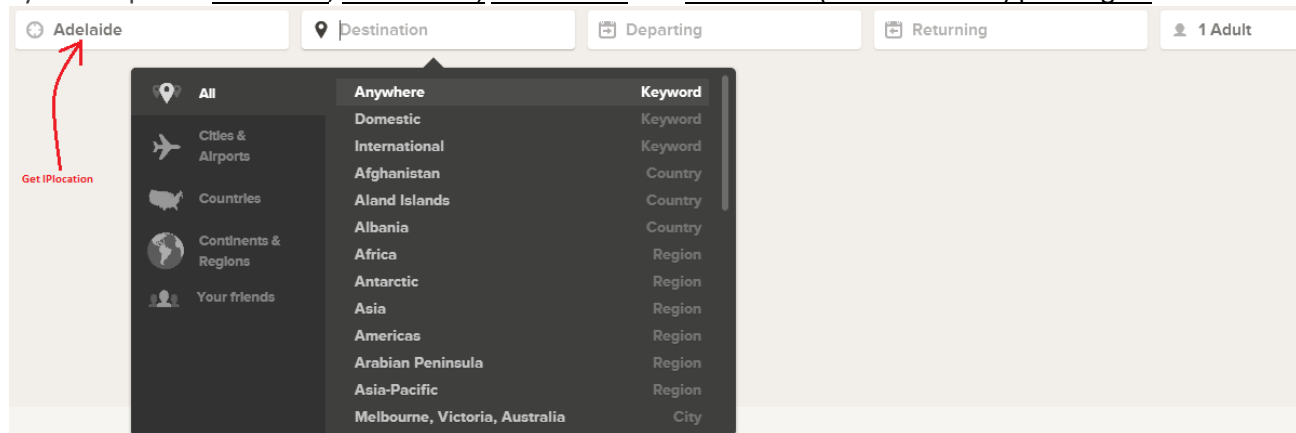

Figure 1 displays three maps illustrating flight routes from Beijing to London. The left map shows a direct flight route (Beijing to London) with a flight time of 11h 45m. The middle map shows a route via Seoul (Beijing to Seoul to London) with a total flight time of 12h 45m. The right map shows a route via Tokyo (Beijing to Tokyo to London) with a total flight time of 13h 45m. Each map includes flight numbers, distances, and estimated flight times.

System searches for ALL tours that visit the country (if city is entered)

System searches for ALL tours in the region the country belongs in.

2) FETCHES RESULT

System captures start date, destination, return date and number of (adult and child) passengers.

The screenshot displays a flight search form with the following fields: 'Adelaide' (with a red arrow pointing to it and a label 'Get IPlocation'), 'Destination', 'Departing', 'Returning', and '1 Adult'. A dropdown menu is open under the 'Destination' field, showing a list of categories and locations. The categories are: 'All', 'Cities & Airports', 'Countries', 'Continents & Regions', and 'Your friends'. The 'All' category is selected, showing a list of locations: 'Anywhere', 'Domestic', 'International', 'Afghanistan', 'Aland Islands', 'Albania', 'Africa', 'Antarctic', 'Asia', 'Americas', 'Arabian Peninsula', 'Asia-Pacific', and 'Melbourne, Victoria, Australia'. Each location has a corresponding 'Keyword' field for search.

Users are provided with filters for each search result and can edit the search criteria.

3) TOUR SEARCH RESULT

System queries tour database for suitable tours based on user input

- Returns tours +/-5 days of departure date and tours with a similar duration.
- Availability is NOT confirmed
- System emails option request for a spot on the tour. Supplier responds to confirmation by way of travel agent login.

Stores start date, city the tour starts from, city the tour ends in and duration of tour and number of (adult and child) passengers for searching flights

Adelaide AU to Alexandria EG July 9 return July 17 x 1

4) Search flights

System parses the city pair (departure city, city the tour starts in, city the tour ends in), tour departure date, duration of tour and number of passengers in Amadeus API.

Example

The screenshot shows a flight search interface. It includes a 'Departure Date' field with a calendar icon, a 'Leaving from' dropdown menu with 'Departure City' selected, a 'Going to' dropdown menu with 'City tour starts in' selected, a 'Return Date' field with a calendar icon, another 'Leaving from' dropdown menu with 'City the tor ends in' selected, a 'Going to' dropdown menu with 'Departure City' selected, and three passenger count fields: 'Adults' (2), 'Children (2-11yrs)' (0), and 'Infants (<2yrs)' (0).

User may edit the search criteria and add more flights

System stores Departure City, Departure Date, Return Date, City tours starts in, City the tour ends in, number of passengers and flight itinerary.

5) Search PRE tour Accommodation

Example

The screenshot shows a hotel search interface. It includes a row of five star rating buttons (1 to 5 stars), an 'Add Room' dropdown menu with '0' selected, a 'City the tour starts in' dropdown menu, an 'Arrival Date' field with a calendar icon, a 'Check out date' field with a calendar icon, and three dropdown menus for 'Hotel Facilities', 'Accommodation Type', and 'Hotel Location'.

System parses City tours starts in, Arrival Date (Departure Date), number of passengers in Travel Cube and Agoda API

The default Check out date is (Arrival Date +1).

- Accommodation tariff is dynamic and live inventory
- User may edit and add more accommodation or skip the process
- System stores accommodation details

6) Search for CAR HIRE

The screenshot shows a car hire search interface with two rows of input fields. Each row contains a dropdown menu labeled 'City or Airport', a date input field, and a time input field set to '10 00 AM'. The first row has a 'CAR HIRE' label on the left, and the second row has a 'Select..' dropdown on the left.

System parses City tours starts in, Arrival Date (Departure Date)

The rest requires user input.

7) TRAVEL INSURANCE

The screenshot shows a 'Quick Quote' form for travel insurance. It includes fields for 'Destination' (a dropdown menu), 'Departure Date' (a date input field with a calendar icon), 'Return Date' (a date input field with a calendar icon), and 'Days' (a text input field). Below these are sections for 'Number Of Adult Travellers by Age' and 'Number Of Dependant Children', each with multiple input fields for different age groups. At the bottom, there are two radio button questions: 'Are all travellers residents of Australia?' and 'Does the trip contain any component where more than 72 hours is spent in the USA, South and Central America or Antarctica?'. A 'Get Quote' button is located at the bottom right.

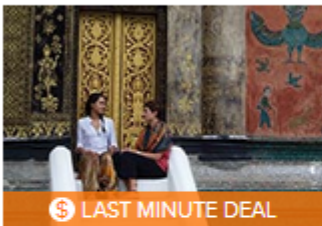

8) Save selected products to MY ITINERARY

SmartView combines all the search result and collapses them into a list in a chronological order (timeline)

*NOTE- Tailor made requests uses a different form.
